Experience

Meta | Network Production Engineering Intern

June 2025 – Sept 2025 | Dublin, Ireland

- Worked in Meta's network infrastructure team, focusing on maintaining and optimizing global network systems.
- Specialized in **routing policy verification** and ensured correct routing behavior.
- Developed automation scripts in Python to monitor network operations and **predict potential failures**.
- Leveraged Linux-based systems to implement mitigation strategies and maintain reliability of large-scale network operations.

iSchool | Coding Instructor

June 2024 – September 2024 | Remote

- Teach programming, data structures, algorithms, and coding to students.
- Mentor and guide students in projects to enhance their practical and theoretical knowledge in coding.

Information Technology Institute (ITI) | Linux Intern

July 2024 – August 2024 | Remote

- Focused on Linux administration, Red Hat operating systems, managing infrastructure, and virtualization.
- Gained hands-on experience with Linux/UNIX systems, managing users, monitoring, services, and system security.

Education

Alexandria National University

Expected June 2026

Bachelor of Computer Science

Alexandria, Egypt

- **Relevant Coursework:** Relevant Coursework: **Data Structures and Algorithms (C++)**, **Object Oriented Programming (JAVA)(OOP)**, Probability & Statistics in CS (Python), Intro to CS II (C++), Linear Algebra, Number theory, Ai& ML, **Operating Systems**, Cryptography, **Computer Networks**, DBMS

Projects

Car Rental System | PHP, MySQL, HTML, CSS, JavaScript

December 2023 – January 2024

- Developed a Car Rental System with a user-friendly interface for reserving, returning, and browsing cars, and viewing reservation history; implemented admin pages and backend functionality using PHP and SQL. Designed the responsive UI using HTML, CSS, and JavaScript, and created an ERD for efficient data management and retrieval.

Clothing Store | PHP, MySQL, HTML, CSS, JavaScript

March 2024 – May 2024

- Developed a seamless and secure online clothing platform with features for browsing, purchasing, and categorizing products, user authentication, and secure payment integration. Ensured secure database management, implemented real-time inventory updates, and created a comprehensive shopping cart and checkout system.

Network Simulation | Cisco Packet Tracer, Networking, Subnetting

April 2024 – May 2024

- Implemented LAN topologies using Cisco Packet Tracer for efficient network design and connectivity, configured IP addressing and subnetting schemes, and collaborated on solutions for network segmentation and management. Conducted rigorous testing to validate configurations and ensure seamless connectivity and routing.

Face Recognition | Python, Machine Learning, PCA, LDA

March 2024 – May 2024

- Performed face recognition using the ORL dataset, consisting of 10 grayscale images of 40 subjects each. Leveraged machine learning techniques like Principal Component Analysis (PCA) and Linear Discriminant Analysis (LDA) to identify the subject of a given image.

Technical Skills

Languages: C++, Java, Python, HTML, CSS, C, SQL, PHP

Networking & Systems: Linux, Kernel concepts, TCP/IP, TCP, UDP, ICMP, DNS

Tools & Technologies: Git, GitHub, Cisco Packet Tracer

Concepts: Problem Solving, Object-Oriented Programming (OOP), Database Management, Networking, Troubleshooting

Achievements

- first place in university's ECPC qualifications and advanced to the ECPC competition for two consecutive years
- Led problem-solving training sessions, mentoring peers in programming and algorithms.
